

HI I'M FERENC HARTMANN

Junior Full Stack Webdeveloper

Hello! I'm Ferenc Hartmann, an enthusiastic webdeveloper. I've learnt web development in Green Fox Academy where I've acquired the basics of web development, eg. how to build a website. I have experience in HTML5, CSS3, javascript (both front- and backend usage), MySQL, and Python programming. I also have 7 years of experience in quality management to guarantee the code quality.

Teamwork

- ☒ Game development
- ☒ Cutting-edge CSS tech
- ☒ 3D printing

- ☒ Logical thinking
- ☒ Optimistic attitude
- ☒ Precision

EDUCATION

2017

Junior Full Stack Webdeveloper
Green Fox Academy

Started programming in Python I've learnt how to write a code that is clean and easy to understand. My specialization is the web developing. It means learning the HTML5, CSS3 and javascript. Using Ajax, creating webserver, learning to use API-s, exception handling and unit testing.

2002-2009

Environmental engineer
Budapest University of
Technology and Economics

I've a master degree in Environmental Engineering. During my studies I've acquired the engineering approach and a deeper logical thinking. This is where I met with my first programming language: the Turbopascal.

EXPERIENCE

2017

Frontend Developer
Black Swan Data

My first programming job was a frontend developer job and I was very happy about it. In a team I've created the frontend of many inflight entertainment systems. This is what you can use on airplanes to watch movies, listen music, check flight data etc. I used HTML5, SASS, Javascript with AngularJS. Workflow was supported by Bitbucket, Jira, SourceTree and Slack. Mobile first philosophy was very important during the development.

2009 - 2017

Quality manager
Gedeon Richter PLC,
Balint Analytics LTD

In my previous professions I worked for 7 years in a laboratory as a quality manager. Here I've learnt the importance of quality assurance. For measuring toxic agents from workplace air I needed to be precise, calm and team player.
